

IBM Developer SKILLS NETWORK

Objective

After completing this lab, you will be able to:

1. Share your results
2. Get link to your notebook for peer review

Upload your Notebook

Once you complete your notebook you will have to share it. Select the icon on the top right a marked in red in the image below, a dialogue box should open, select the option all content excluding sensitive code cells.

The screenshot shows the IBM Cloud Pak for Data interface. At the top, there's a header with 'IBM Cloud Pak for Data' and an 'Upgrade' button. Below the header, there's a navigation bar with 'My projects / hello1 / House_Sales_in_King_Count_USA'. The main content area displays the notebook title 'House Sales in King County, USA' and a description: 'This dataset contains house sale prices for King County, which includes Seattle. It includes homes sold between May 2014 and May 2015.' Below the description, there's a list of variables: 'id: A notation for a house', 'date: Date house was sold', 'price: Price is prediction target', and 'bedrooms: Number of bedrooms'. A 'Share test' dialog box is open, showing options to share the notebook. The dialog box has a title 'Share test' and a subtitle 'Share a read-only view of this notebook.' It includes a search icon and the text 'Share with anyone who has the link.' Under 'Cell content', there are three radio button options: 'Only text and output' (selected), 'All content excluding sensitive code cells' (highlighted with a red box), and 'All content, including code'. Below these options, there's an information icon and the text 'The link always points to the most recent version of the notebook.' A 'Permalink to view notebook' is provided: 'https://dataplatform.cloud.ibm.com/analytics/notebooks/v2/de10d626-9896-4330-bfd5-8f'. At the bottom of the dialog box, there's a 'Close' button.

Share test

Only sensitive code cells

☒ All content excluding sensitive code cells

☐ All content, including code

This option allows you to exclude code cells containing sensitive data. You can hide these code cells with a specific comment line in your code. When you share the notebook, for all code cells containing this comment line the code will not be displayed. A version is saved for your notebook. The link always points to the most recent version of the notebook.
